

KOBRA™

PROBABLY THE HIGHEST SNOW PRODUCTION ON THE MARKET

The best snow gun for you with traditional installation or with Innosnow's automation solution. Kobra produces a lot of snow already at the first minus degrees - quickly, easily and efficiently. With our fully automatic solution, you take advantage of all important cold hours in the margins and in the cold.

EFFICIENT

Innovative nozzles and 3 pcs separate nucleators give you high snow production from -2cWB.

CONTROL ABILITY

Flexible adjustment of water flows in case of temperature changes.

NO NEED FOR FILTERS

Larger passages and nozzles less sensitive to dirt.

FOUR STANDARD LENGTHS

Easy to customize with its four different standard lengths of 3 m, 4.5 m, 6 m and 9 m.

FOLLOW YOUR SYSTEM IN REAL TIME

See consumption, temp, flow, operation, etc. via [Innosnow Cloud](#) (4G network).

KOBRA - TECHNICAL SPECIFICATION
